

Resolution on the situation in Hungary submitted by the Federation of the Chemical, Energy, and General Workers' Union of Hungary at IndustriALL Global Union's Executive Committee meeting in Mexico City on 29-30 November 2018

Anti-employee amendment of the Hungarian Labour code

At its Executive Committee meeting on 29-30 November 2018, IndustriALL Global Union discussed the anti-employee amendment of the Hungarian Labour Code.

The improvement of competitiveness shall not be based on the deterioration of workers' position and on cutting their rights.

On behalf of 140 countries and their 50 million workers, IndustriALL Global Union protests against the submission by the governing FIDESZ, as the bill would establish a time-frame of 36 months and an overtime threshold of 400 hours.

IndustriALL Global Union and its affiliates are in solidarity with the Hungarian workers and their unions, and calls on the Government of Hungary to act in strict accord with national and international core labour standards.
