In solidarity with Atomprofspilka

Dear Brother Valeriy,

I am writing to you to offer our full solidarity and support to more than 12,000 members of Atomprofspilka, who organized industrial actions throughout the country last week to highlight their discontent with the current state policies in the sector, and make known their legitimate demands.

IndustriALL Global Union fully supports your call for, inter alia, a clear state policy regarding the strategic nuclear sector development, a robust and genuine social dialogue, an end to discriminating tariffs from the National Energy and Utilities Regulatory Commission, and competitive wages, which would also contribute to avoid the loss of qualified personnel.

We truly hope that the government will address immediately the workers' demands. We stand firm in solidarity with Atomprofspilka, and we are ready to provide further support at the global level.

In solidarity,

Valter Sanches
General Secretary
