**THE UGLY  
TRUTH**

**INDUSTRIALL  
CAMPAIGN  
TARGETS  
RIO TINTO**

## **GLOBAL DAY OF ACTION AT RIO TINTO**

All around the world, workers are being hit hard by Rio Tinto cost-cutting. Our rights to collectively bargain are under attack. Our communities are suffering because our employer puts profits before people. The truth about Rio Tinto is ugly.

A network of unions from nearly 20 countries where Rio Tinto operates has come together to call for a better Rio Tinto.

We are demanding respect for our unions and for workers' rights, healthy and safe workplaces, and that Rio Tinto stop undermining our jobs through the use of precarious labour.

**Precarious labour includes temporary, casual and contracted-out work that is often low-wage, low-benefit and insecure.**

Rio Tinto employees across the globe are distributing this information today as part of the October 7 World Day for Decent Work, a day on which unions around the globe mobilize against precarious labour.

Through this and other protest actions, we are sending the message that we reject the ugly truth. We demand a better Rio Tinto.
